Spicls

Spicls is a set of Cloud Services about the DIVA2 products. **Spicls** means: Servicing vending machines in an elegant way and to pass data to the backend systems. The special feature is that the various data types such as EVADTS, transactions, alarms can be flexibly sent to different back office systems, as you prefer. So automatic billing, inventory control, alarm and disposition management and user management can be managed in separate systems. **Spicls** ensures that the correct data arrives at the right time at the right place.

Spicls [Spider Cloud Services]

Why Spicls:

- Costs control: reduction of the filling and maintenance costs of vending machines and payment systems
- Faster reaction times for interventions, price or configuration changes, software updates
- Optimization of hardware costs: Smartphones and tablets instead of expensive handhelds
- Targeted modification of the configuration due to direct access to the Service Menu of DIVA devices
- SaaS (Software as a Service): out-of-the-box available, no software installation
- Most open and flexible cloud solution for vending on the market, compatible with all background systems

Modular Services

- EVADTS: exact time delivering for EVADTS files to the ERP system of the customer
- TRANSACTIONS: single sales, payment (cashless, cash, virtual, etc.), users and much more
- PRICES: time controlled changeover, 5 different PL, Happy Hour, connection to ERP
- ALARMS: Alerting in real time
- FOTA (Firmware update), CONFIGURATION, LOGS: independently supported services from the **Spicls** database

DIVA2 family and Spicls:

- DIVA2, LeX or DeLight in vending machine
- simple internet connexion via LAN, Wlan or GSM (Extension204)
- 4 in 1: Cashless, Audit, Telemetry, Mobile Payment (QR, NFC, BLE)
- scalable hardware (basic module and extension modules)
- uniform date for all vending machines and payment systems
- remote access: each box can be accessed directly via PC / tablet / smartphone
- best price – performance ration on the market

Ext204 GSM: plugged directly
